

these permits. This lack of significant impact is due, in part, to the State Reimbursement Fund's reimbursement to the discharger of all NPDES permit compliance costs, except for a small deductible amount. EPA Region 6 therefore certifies, pursuant to the provisions of 5 USC 605(b), that the permits proposed today will not have a significant impact on a substantial number of small entities.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104-13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. The FCC is reviewing the following information collection requirements for possible 3-year extension under delegated authority 5 CFR 1320, authority delegated to the Commission

by the Office of Management and Budget (OMB).

SUPPLEMENTARY INFORMATION:

OMB Approval Number: 3060-0435.

Number of Respondents: 2.

Estimated Time Per Response: 2 hours.

Total Annual Burden: 4 hours.

Needs and Uses: The reporting requirement contained in Section 80.361 is necessary to require applicants to submit a showing of need to obtain new or additional narrow-band direct-printing (NB-DP) frequencies. Applicants for new or additional NB-DP frequencies are required to show the schedule of service of each currently licensed or proposed series of NB-DP frequencies and to show a need for additional frequencies based on at least a 40% usage of existing NB-DP frequencies. The information is used to determine whether an application for a NB-DP frequency should be granted. If the collection of this information was not conducted, the FCC would have no information available regarding the use of NP-DP frequencies by public coast stations, and, therefore would be handicapped in determining whether the frequencies were being hoarded and not put into use by public coast stations.
